

Industry Leading Technical Training

Improve your knowledge and ROI with MCE Factory Training Classes

MCE Factory Technical Training classes pay big dividends by teaching installers, adjustors and maintenance professionals about MCE controllers before they actually work with them. Learning correct techniques and methods in a simulated training environment—rather than on the job—will keep your expenses low, and your return on investment high.

MCE Factory Training will improve your Return on Investment (ROI) through:

- Improved labor efficiency
- Better elevator operation
- "Tips and Tricks" from control experts
- Time and labor saving resources and capabilities

How?

MCE Factory Technical Training classes provide students with a better working knowledge of installation, operation and maintenance practices for MCE controls.

Classroom lectures are combined with a state-of-the-art lab setting to provide optimum results and retention of information. Most classes take place over a two-day period and include small group hands-on sessions and one-on-one time with an MCE technical instructor for full adjustment of selected controller types. Plus, the classes focus on A17.1/B44-00 compliant equipment training.

Class curriculum includes:

- Controller functions
- Computer diagnostic tools
- Job print reading
- Pattern generation and fine tuning
- AC and DC drive adjustment
- Signal tracing
- Landing selector systems
- Sequence of operation
- Machine and rotating equipment concerns

Students receive instruction on live equipment

Code Compliance

Classes include A17.1, B44-00 compliance information.

Product/Audience Specific

Our product and audience specific classes address the requirements of installation, adjustment, maintenance, and repair personnel.

Factory technical training classes provide students a better working knowledge of installation, operation, and maintenance practices for MCE controls.

Lecture sessions are combined with hands-on labs, providing an effective learning environment to maximize information retention.

Daily Schedule

Classes begin promptly at 7:30 am each morning at MCE's training center, and end each day at 4:30 pm.

Feel free to dress casually but remember you're in a manufacturing environment and for your own safety, please avoid wearing shorts or open-toed shoes.

Continental breakfast and lunch are provided. MCE staff members frequently join the group for lunch. Following lunch, classes resume for a full afternoon of training.

Travel arrangements

Air travel to Sacramento

Sacramento International Airport (SMF) is the closest airport to MCE. Airport to MCE driving time is about 45 minutes. Other airport options are:

- San Francisco International: 3 hours drive time
- Oakland International: 2 hours drive time
- Reno International: 3 hours drive time (weather permitting)

Ground transportation

We recommend you rent a car at the airport where vehicle pick up and drop off are convenient. MCE does not provide transportation.

If you plan to rent a car at the hotel, be sure to call in advance to make arrangements. You can arrange airport-to-hotel shuttle service through Super Shuttle. Call 1.800.BLUEVAN for reservations.

Hotel Options

Fairfield Inn & Suites by Marriott

10745 Gold Center Drive

Rancho Cordova, CA 95670

916.858.8680 in-house reservations

Indicate you are attending a MCE training course for a Group rate.
