

Free Industry Leading Technical Training

Improve your work force's knowledge with MCE Factory Training Classes

MCE Factory Technical Training classes pay big dividends by teaching installers, adjustors and maintenance professionals about MCE controllers before they actually work with them. Learning correct techniques and methods on a live controller at MCE—rather than on the job—will keep your expenses low, and offers you a technical advantage during installation as well as maintenance.

MCE Factory Training will improve your Return on Investment (ROI) through:

- Improved labor efficiency
- Better elevator operation
- "Tips and Tricks" from control experts
- Time and labor saving resources and capabilities

How?

The free MCE Factory Technical Training classes provide students with a better working knowledge of installation, operation and maintenance practices for MCE controls.

Classroom lectures are combined with a state-of-the-art lab setting to provide optimum results and retention of information. Classes take place over a two-day period and include small group hands-on sessions and one-on-one time with an MCE technical instructor for full adjustment of selected controller types. Plus, the classes focus on A17.1/B44-00 compliant equipment training.

Class curriculum includes:

- Controller functions
- Computer diagnostic tools
- Job print reading
- Pattern generation and fine tuning
- AC and DC drive adjustment
- Signal tracing
- Landing selector systems
- Sequence of operation
- Machine and rotating equipment concerns

Students receive instruction on live equipment

Code Compliance

Classes include A17.1, B44-00 compliance information.

Product/Audience Specific

Our product and audience specific classes address the requirements of installation, adjustment, maintenance, and repair personnel.

Factory technical training classes provide students a better working knowledge of installation, operation, and maintenance practices for MCE controls.

Lecture sessions are combined with hands-on labs, providing an effective learning environment to maximize information retention.

Daily Schedule

Classes begin promptly at 7:30 am each morning at MCE's training center, and end each day at 4:30 pm.

Feel free to dress casually but remember you're in a manufacturing environment and for your own safety, please avoid wearing shorts or open-toed shoes.

Continental breakfast and lunch are provided. MCE staff members frequently join the group for lunch. Following lunch, classes resume for a full afternoon of training.
